■ WORK EXPERIENCE

- Aky Tech Full-Stack Developer 06.2019 – Still Working
In our projects we use Java for backend development and React.js for frontend development. And as version control we use Git.
- Warlock Arts Web Application Developer 10.2018 - 04.2019
Developed Playable-Ads with WebGL, JavaScript game engines and other JS technologies for the games the game developers build.
- Betonel A.Ş. Web Application Developer 03.2017 - 10.2018
Developed 3D web applications with JavaScript frameworks. As 3D JavaScript library I have used THREE.js and as modelling 3D objects; Blender 2.78. For server-side, I used PHP and MySql.
- ASELSAN Software engineering department – 25 working days
(Internship)

During my one month internship I have supported the project with my in JavaScript created Flot Charts in Software Engineering Department.
Furthermore I wrote also descriptions of the project source code.

- BOTAŞ A.Ş Software engineering department – 25 working days (Internship)
Imported Excel datas from Excel to Oracle database with Java.
